# Infor CloudSuite Public Sector essentials packaging for government

**Migrate sooner to the cloud with the vital capabilities you need**

## **Streamlined solutions that modernize small to medium-sized governments**

City and county governments of all sizes are striving to implement more forward-thinking approaches to staffing and constituent services. Challenging this goal, limited staff resources and capital budgets consistently create demands to streamline back-office business functions. At Infor®, we understand that only software made specifically for the public sector can deliver the capabilities your growing government agency requires to accomplish all this. That's why Infor has been helping local governments for more than 25 years with complex and cross-disciplinary governmental operations and services; to provide tailored, responsive, and more personal solutions to meet citizen's expectations and ensure future communities success. Infor CloudSuite™ Public Sector essentials packaging for government is a bundled solution that integrates key operational functions—financials, procurement, human capital management, and payroll—while offering extended functionality such as advanced data analytics and budgeting. It is specifically curated for small to medium-sized governments, enabling faster implementation and continuous ROI without additional investments in staff and hardware.

## **The right tools. The right applications. At the right time.**

Infor CloudSuite Public Sector essentials packaging for government offers comprehensive capabilities to help smaller governments capitalize on the digital revolution, and continue their drive to efficiency and innovation. Deployed in the cloud, financials, procurement, and HCM modules are completely integrated, along with Infor Birst® enterprise analytics providing unprecedented insights and more informed decision making.

## Built for growing needs

Infor has extensive experience with all levels of government entities—county, city, state, and federal. With that expertise, we have carefully curated the components of CloudSuite Public Sector essentials for government to include critical capabilities for the unique needs of smaller government organizations. Based on best practices and guided configurations, this comprehensive and next-generation ERP solution is offered at a lower price point, with AWS® cloud computing services providing the scalability and security needed as organizations digitize growing data volumes.

## See solutions, fast

Infor CloudSuite Public Sector essentials packaging for government is built with identified, Infor-built Implementation Accelerators (IA). These accelerators are preconfigured solutions based on the latest version of Infor application suites. They are designed to deliver specific, core industry application processes. Implementation services provided by both Infor Consulting and our Certified Infor Partner firms ensure a smooth and expedited path to go-live, saving time and costs along the way.

## Eliminating the lag of legacy

Infor's multi-tenant cloud platform allows for seamless migration from legacy systems, creating unprecedented connections across core business functions. Cloud deployment allows staff to quickly take full advantage of available functionality, and enables a wide deployment of mobile capabilities, from the office, to the field, to anywhere in between.

## Security and compliance at its core

As a leading provider of government cloud applications at every level, Infor is committed to consistently delivering secure, audit-ready solutions that support regulatory compliance. Knowing safety risks occur both internally and externally, our development and implementation teams work to ensure that each step of the migration process includes tested controls and compliance, eliminating opportunities for unauthorized data access.

Deployed using AWS cloud services, Infor CloudSuite Public Sector essentials packaging for government fortifies any government organization against unrelenting ransomware attacks and other challenges to their cybersecurity.

## A focus on your mission

Seventeen of the twenty largest cities in North America are powered by Infor solutions. Governments of all sizes reap the benefits of our dedication to helping public sector organizations achieve their missions.

Our customers say it best:

- “We don’t have enough people to manage a growing data center, yet we expect to double our number of system users. By migrating to the cloud with Infor, we have scaled to meet increasing demand, without adding staff.” — City of Greensboro
- “Because of the pandemic, we’re all working from our homes. We’re accelerating our Infor product so that people can submit things online. Our digital transformation will allow us to be able to serve our community and ensure business continuity.” —Calvert County, MD
- “One of the things we’d tell HR when they would ask questions like, ‘Well, what am I going to do now?’ We’d say, ‘Something more important.’ ”—State of South Dakota

## Support for state and local government

Infor is committed to small- and medium-sized governments and their growing and evolving needs. Infor CloudSuite Public Sector essentials packaging for government is a bundled solution comprising financials, procurement, HCM, and payroll—fully integrated with sophisticated functionality formerly afforded only to larger government entities. Deployed in the cloud, it promises rapid implementation of critical operational functions, while also saving time, costs, and resources.

## Powering the business of government

- Developed specifically for small- to medium-sized government entities
- Configured prioritized capabilities for rapid deployment
- Eliminates data silos across agencies and departments
- Built with mobile-first functionality for a changing workforce
- Enables flexibility and ease of online transactions
- Cloud deployment includes automatic updates and scalability
- Provides optimum data security through Amazon Web Services® (AWS)
- Includes full disaster recovery protocol
